WORKFLOW // NO APP NEEDED

How I *automated* my finance tracker using Claude

Six steps. One Google Sheet.
Zero finance apps.

GOOGLE SHEETS CLAUDE SWIPE →

STEPS 01-03 // SET IT UP ONCE

Set it up *once.*

STEP 01

CONNECTOR

Connect Google Sheets

Link my Google account to Claude so it can read and write my sheet.

STEP 02

STRUCTURE

Claude builds the sheet

I describe what I track. Claude creates the columns, formulas and monthly tabs.

DATE	CATEGORY	AMOUNT
02 NOV	FOOD	450
02 NOV	RIDE	180

STEP 03

INPUT

Log it in plain words

No forms, no app. I just type what I spent, like texting a friend.

spent 450 tk on lunch, paid with bKash

+ 1 ROW ADDED

STEPS 04-06 // DAILY USE

Then I just *talk* to it.

STEP 04

AUTO-SORT

Categorize & total

Claude tags every entry and keeps the totals and formulas up to date.

STEP 05

ASK

Ask anything

Spending questions get real answers straight from my own data.

STEP 06

AUTOMATE

Weekly spend report

A scheduled task sums up my week: where the money went and what changed.

BENEFITS // WHY IT WORKS

Why I *dropped* the app.

No subscription

No paid tracker app. Just Claude and a free Google Sheet.

My data, my sheet

Everything lives in my own Drive. Easy to export, never locked in.

Plain language

Logging takes five seconds. If I can text it, I can track it.

Instant insights

Answers and reports on demand, not buried in charts.

Stop tapping forms. *Just tell it.*
